CFM56-3

Cradle Transportation Stand

The low profile transportation/shipping stand is designed for transport and storage of **CFM56-3 engines** in maintenance areas and for shipment by **air land and sea**.

■ **Meets specification**

CFMI – PITF55, IAE6R18897, SAE ARP1840 and ISO 11241 General Standards for Aircraft Engine Transportation Devices.

■ **Complies with relevant Health & Safety** requirements of the Machinery Directive 98/37/EEC.

■ **The cradle transportation stand** secures the engine and support cradle to enable mobility during maintenance events and transportation by **air land and sea**.

■ **The engine support cradle** rests on six shock absorbing bumper blocks and the cradle transportation stand moves on four spring loaded castors.

■ **The cradle transportation stand** can be factory finished to customer requirements. Standard finish is 'EPOGLAC SP' RAL 2003.

■ **The transportation Stand dimensions are:**

Length	4.060m	133.2ft
Width	2.480m	81.3ft
Weight	700kg	1540lb
